**Other business provisions**

- Unfortunately, many businesses are facing losses due to the economic impacts from the pandemic. For losses arising in tax years 2018, 2019 and 2020, a five-year carryback is now allowed to help businesses recoup some of their prior taxes.
- Interest expense deduction limitations are more taxpayer favorable. Under prior legislation, net interest expense was limited to 30% of adjusted taxable income. This limitation has been increased to 50% for tax years 2019 and 2020.
- Depreciation modifications were made in connection with non-residential qualified improvement property to allow for a faster write-off of these assets. Under prior legislation, this type of property was required to be depreciated over 39 years. Under the recent legislation, this depreciation period has been reduced to 15 years, and these assets will now be eligible for bonus depreciation which will allow for an immediate deduction of the entire cost of the property.
